

REVELWOOD®

FACT SHEET

ABOUT US

Revelwood helps organizations grow revenue and profits through the use of data and analytics. We leverage the best of IBM's Analytics technology and Cognitive solutions to optimize operational performance, customer outcomes and financial results. Offering products, services, training and support, we combine IBM's Analytics software with best practices and pre-configured, out-of-the-box applications to help businesses achieve their full potential. Hundreds of successful implementations and proven ROI for Fortune 1000 and mid-market companies are just a few reasons companies turn to Revelwood.

As an IBM Gold partner, Revelwood has demonstrated superior skills and success in delivering innovative solutions across the enterprise. We actively collaborate with finance, sales, marketing and operations to help companies become truly analytics-driven. Our solutions bring ease, speed and flexibility to enterprise planning, reporting and advanced analytics.

Our "speak business first" approach allows us to understand both your challenges and your opportunities, in order to deliver useware not shelfware. By combining business insights with our out-of-the-box implementation accelerators and tools, we're able to craft effective, tailored solutions in record time.
